Kids Helpline Statistical Summary Victoria

Insights into young people in Australia

Introduction

What is Kids Helpline?

Kids Helpline has been operating for 26 years and is Australia's only 24/7 counselling and support service for children and young people aged between 5 and 25 years.

Tertiary qualified counsellors provide free, private and confidential support via telephone, web chat and email. Telephone and email counselling is offered 24/7 and web counselling is available from 8am to midnight (AEST) seven days a week.

The service operates a substantial website with a diverse range of resources for self-directed help-seeking by children, young people and adults. In addition, support from Optus enables Kids Helpline to deliver an early intervention and prevention program in primary schools called *Kids Helpline @ School* through their Digital Thumbprint Program.

Kids Helpline is a service of **yourtown** and is 72% funded by the community through **yourtown** Art Union ticket sales, donations and corporate support. The remaining 28% is funded through State and Commonwealth Government grants.

What this report is about and who is it for

This report is an appendix to *Kids Helpline Insights 2017: National Statistical Overview*. It provides summary data on Kids Helpline service demand and client concerns and characteristics for Victoria in relation to the 2017 calendar year. It will be of value to people working in social policy and research roles, journalists and others in the community who need to understand the current and changing help-seeking needs of children and young people in Australia today.

The *Kids Helpline Insights 2017: National Statistical Overview* and other related reports can be accessed at www.yourtown.com.au/insights/annual-overviews.

Notes on data collection, analysis and interpretation

Substantial missing data in relation to a number of data collection fields, most notably remoteness and cultural background, undermine the reliability of data presented in a number of tables and figures in this report. Please consult the Appendix of the National Statistical Overview for more detailed information on data collection, analysis and interpretation.

Service demand

Attempted and answered contacts

- In 2017, 87,420 of the 339,724 attempts made to contact Kids Helpline counselling service (or 26%) came from Victoria.
- Most of these attempts were made by phone (61,332) but also by web chat (22,397) and email (3,691).
- 42,300 of these attempts were answered by counsellors, corresponding to a response rate of 48%. This compares with a response rate of 46% across Australia.
- Note that when phone attempts are adjusted to exclude callers who dropped out before the 21 second mandatory wait message, the response rate for Victorian phone contacts in 2017 was 61%.

Trends over time

- From 2015 to 2017 there was an overall decrease of 3% in attempted contacts from Victoria across all media. Phone attempts decreased by 10% and email by 13%, while web chat attempts increased by 80%.
- Across all media, response rates for Victoria have decreased from 61% in 2014 to 48% in 2017.

Table 1. Victorian attempted and answered contacts – by medium and year of contact, with comparison to all states¹

1. The data presented in this table are sourced from KHL phone, web chat and email systems databases.

2. In addition to 15,886 emails received and responded to in 2015, 535 outreach emails were sent.

3. In addition to 13,681 emails received and responded to in 2016, 413 outreach emails were sent.

4. In addition to 12,662 emails received and responded to in 2017, 418 outreach emails were sent.

Who contacted the service

Demographic characteristics

- Kids Helpline counsellors recorded data in relation to 154,868 contacts from children and young people across Australia who were aged 5-25 years. State or territory information was available for 140,007 of these contacts, and of this subset 37,184 (or 27%) were known to be from Victoria.
- Table 2 shows the demographic characteristics of these contacts from Victoria and compares them with the characteristics of contacts from the rest of Australia where the contact's state or territory was known.
- As with contacts from the rest of Australia, more than seven out of 10 (73%) contacts from Victoria were female and just under half (48%) were aged 13-18 years.

- Compared with contacts from the rest of Australia, Victorian contacts were:
 - more likely to be aged over 18 years
 - more likely to be from culturally and linguistically diverse (CALD) backgrounds and less likely to be from a Caucasian Australian background or an Aboriginal / Torres Strait Islander backgrounds
 - less likely to be living in in Outer Regional/Remote areas, and
 - slightly less likely to contact by phone and more likely to contact by web chat or email.

Table 2. Characteristics of Kids Helpline contacts 2017 aged 5-25 years – Victoria and rest of Australia¹

1. Where column percentages sum to more or less than 100%, this is due to rounding.

2. TSI = Torres Strait Islander. CALD = Culturally and linguistically diverse. ATSI = Aboriginal and/or Torres Strait Islander

3. Remoteness classifications are adapted from the Australian Statistical Geography Standard (ASGS) used by the Australian Bureau of Statistics. See *Kids Helpline Insights 2017: National Statistical Overview* for more information.

Types of help-seeking

The Kids Helpline counselling and support service responds to two broad categories of help-seeking: those children and young people seeking counsellor assistance for a particular concern or problem (*counselling contacts*), and those seeking information, referral to other services, or some other form of non-counselling support, like general conversation or playful engagement (*non-counselling contacts*, also called *information, referral and other contacts*).

As shown in Table 2, 43% of contacts from Victoria in 2017 were seeking counselling support while 57% were seeking information/referral or other forms of non-counselling support.

Demographic trends over time

Table 3 presents the characteristics of Victorian contacts over the last three years to consider whether there have been noteworthy variations in the client group over the short term. Key observations from the data in Table 3 include the following:

Table 3. Characteristics of Victorian Kids Helpline contacts aged 5-25 years – by year¹

Contact characteristics	2015 (N = 46,711)		2016 (N = 41,221)		2017 (N = 37,184)

1. Where column percentages sum to more or less than 100%, this is due to rounding.

2. A new gender category was introduced into Kids Helpline data collection from January 2015.

3. TSI = Torres Strait Islander. CALD = Culturally and linguistically diverse. ATSI = Aboriginal and/or Torres Strait Islander

4. Remoteness classifications are adapted from the Australian Statistical Geography Standard (ASGS) used by the Australian Bureau of Statistics. See *Kids Helpline Insights 2017: National Statistical Overview* for more information.

- Over the last three years, there would appear to be:
 - a decrease in the proportion of Victorian contacts engaging by phone and an increase the proportion engaging by web chat,
 - a slight increase in the proportion of contacts from 5-12 year olds, and
 - an increase in the proportion seeking counselling support and a corresponding decrease in the proportion seeking non-counselling support.
- All other characteristics of Victorian contacts have remained consistent over the short-term.

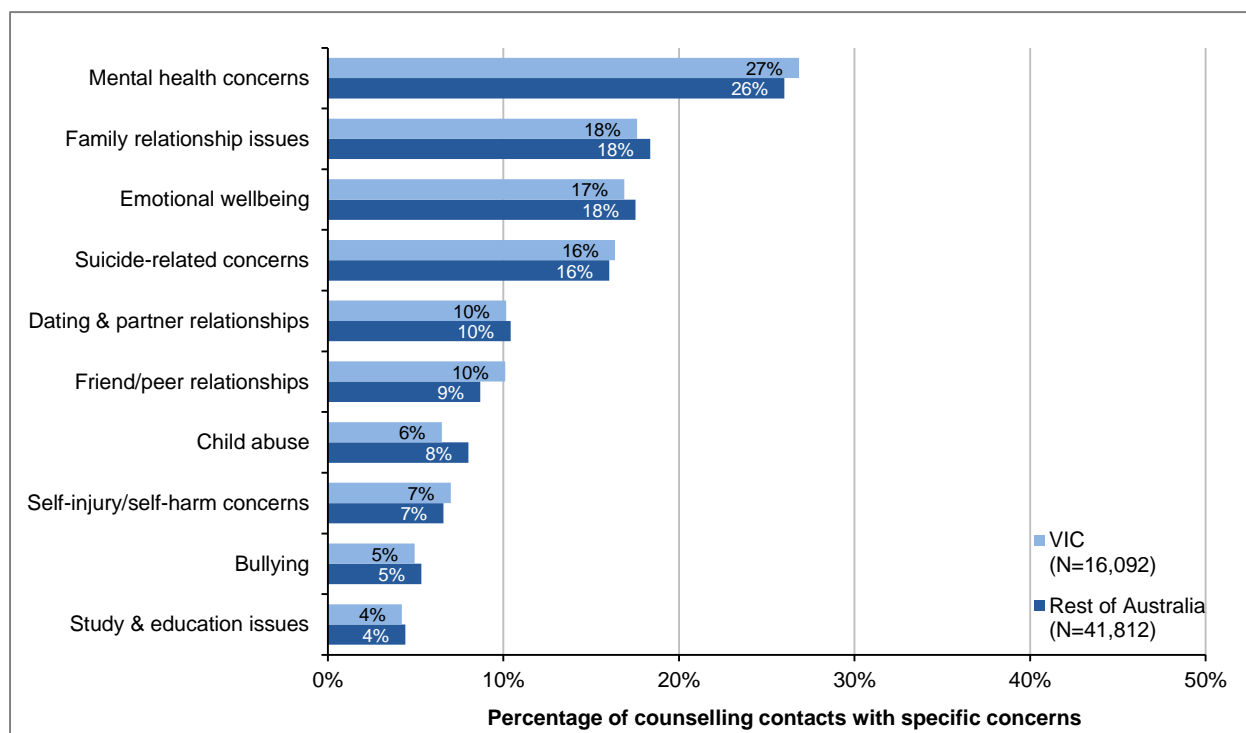

Most common concerns of children and young people who received counselling

During 2017, Kids Helpline counsellors responded to 66,386 contacts from children and young people who were seeking help about specific problems or concerns (i.e. counselling contacts). Analysis of the types of issues and concerns raised by children and young people in these sessions provide a valuable insight into the help-seeking concerns of young Australians today.

Victoria compared with rest of Australia

- State or territory information was available for 57,904 of these 66,386 counselling contacts and of this subset 16,092 (or 28%) were known to be from Victoria.
- Figure 1 shows the 10 most common concerns of Victoria counselling contacts in 2017 and compares this with the frequency with which these concerns were raised by counselling contacts from the rest of Australia where state or territory information was known.
- The key observation to be noted from the data is that the frequency with which children and young people in Victoria sought help from Kids Helpline for all of these issues is consistent with the frequency with which children and young people elsewhere in Australia sought help for these issues.

Figure 1. Most frequently recorded concerns of Kids Helpline counselling contacts 2017 aged 5-25 years – Victoria compared with the rest of Australia (sorted in descending frequency of Victorian concerns)¹

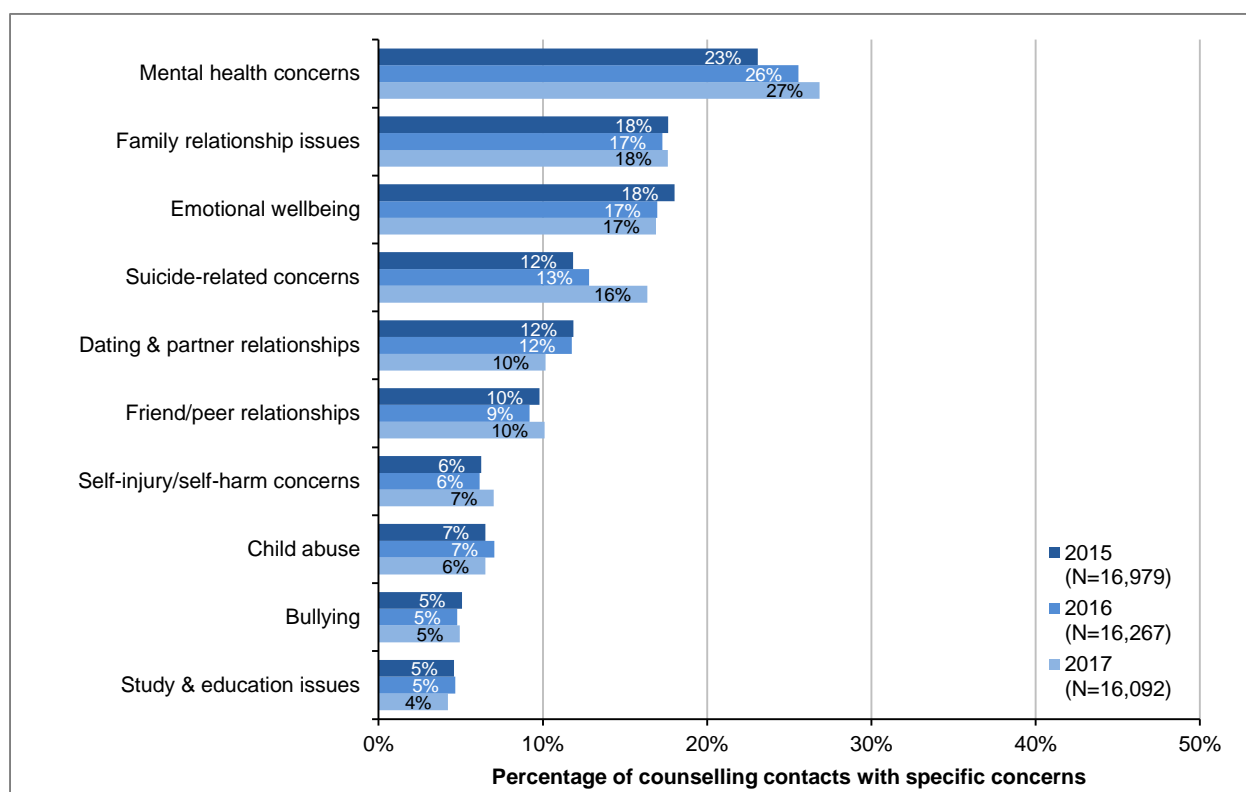

1. Up to four concerns per contact may be recorded. Accordingly, percentages may sum to more than 100%.

Trends over time

Figure 2 shows the 10 most common concerns of Victorian counselling contacts in 2017 and compares this with the frequency with which these concerns were raised by Victoria contacts in 2015 and 2016.

- The key observation to be noted from the data is that the frequency with which children and young people in Victoria sought help from Kids Helpline for most of these issues has remained consistent over the short-term, and
- There appears to be an increase in the relative frequency of occurrence of mental-health-related contacts and in suicide-related contacts since 2015.

Figure 2. Most frequently recorded concerns of Victorian Kids Helpline counselling contacts aged 5-25 years – by year (sorted in descending frequency of 2017 concerns)¹

1. Up to four concerns per contact may be recorded. Accordingly, percentages may sum to more than 100%.

All concerns of children and young people who received counselling

Children and young people contact Kids Helpline about a very wide range of concerns, and focusing on the 10 most common concerns can obscure that diversity and the emergence of trends in other areas of less common client concern.

To address this issue, Table 4 reports the frequency with which *every concern* in the Kids Helpline's concern classification system was raised by counselling contacts from Victoria in 2017 and compares this with the frequency with which the concern was raised in 2016 and 2017. Table 4 groups individual concerns under eleven 'concern classes' which aggregate frequencies across conceptual clusters of client concern.

The key observations to be noted from the data in Table 4 are that:

- the frequency with which children and young people in Victoria are contacting Kids Helpline about all these different concerns and classes of concern is quite consistent over the short-term, and
- there appears to be an increase over time in the relative frequency of suicide-related contacts.

Table 4. Number and proportion of Kids Helpline counselling contacts 5-25 years with particular concerns and classes of concern – Victoria by year¹
